

# The Norton Garden Shed, Workshop, Store Building

## The Norton

Leofric Norton Apex style Garden buildings suitable as a Shed, Workshop, Store room or anything you want it to be. Made from 6ft 6 high steel reinforced interlocking concrete panels for maximum strength.

**metrotile**  
LIGHTWEIGHT ROOFING

The Leofric Norton New design, 15 degree pitch Apex with a metrotile lightweight high grade steel roof coated in Aluzinc and bonded with charcoal grey stone granules with matching ridges.

Available in up to 32 size combinations ranging from 4ft 6 x 4ft 6 to 8ft 6 x 13ft 10. Includes a Fort Knox high security door, white powder coated, double skin, twin opening giving a maximum opening width of 1050mm. The highest security is guaranteed with a 3-point, 9-bolt locking system with a strong rigid frame and stainless steel cill. The double door is available in all but the smallest size building 4ft 6 x 4ft 6.

The standard finish is Cotswold, a small rounded buff stone, quarried locally. In the cotswolds also available in Canterbury, Whitespar or Brownstone at a small extra cost.

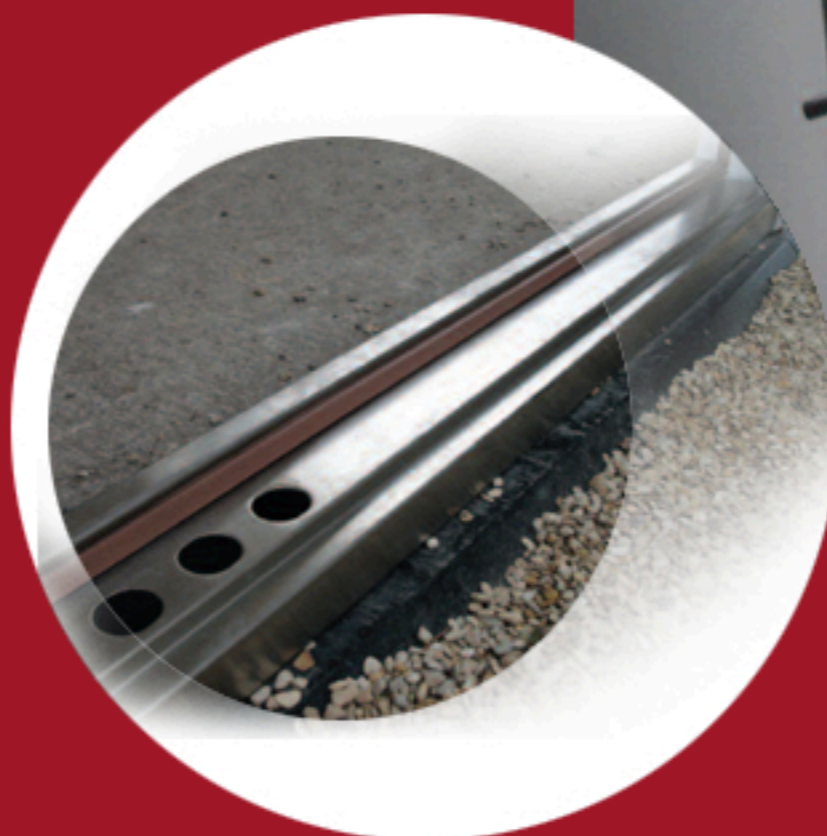

Windows are optional in uPVC. Whether it is a low cost fixed single glazed unit or, where it is possible, an extra wide, double glazed unit in slide opening or top opening is required. A number of options are available.

## Fort Knox

'Fort Knox' Personnel doors from Leofric, the strongest and most secure in the industry.
